BONUS INFORMATION: VPNs (Virtual Private Networks)

Although we may not have covered Virtual Private Networks in the presentation, they can be one of the most important tools you can use for your own security and privacy. We are providing a link to three articles explaining what VPNs are and why they are valuable. We encourage you do to your own research and to look at even more VPN services and products to find the best solution for your needs, but please educate yourself about this technology, and consider VPN use on every device, especially mobile devices. Also consider anti-malware protection for all of your devices.

Do you need a VPN to keep your personal information safe? <https://www.bizjournals.com/bizjournals/how-to/technology/2017/05/do-you-need-a-vpn-to-keep-your-personal.html>
